

# DRUG & ALCOHOL TESTING

**Employee Screening Services**

Screening services are critical for many business processes, from hiring to regulatory compliance. Medcor's Employee Screening Services feature fast turnaround times, simple and accurate billing, and dedicated customer service to streamline processes for you.

**Improve Hiring and Retention**

**Reduce Injuries**

**Lower Overall Health Care Costs**

## Our Collection Process

**1**

### Collection

A sample is collected from the candidate or employee. An initial screening panel is run to determine a positive or negative absence of a detectable drug.

**2**

### Confirmation

If the presence of a drug is confirmed a second screen is performed. Results are reviewed by our Medical Review Officer.

**3**

### Review Results

Results are provided to the employer within 1-3 days of the test via Medcor's digital platform.

## Our Services

Drug and Alcohol Testing	Screening Programs	Medical Review Services
1000's of Convenient Collection Sites	Custom Program Development (Pre-Placement, Post-Accident, Random, Reasonable Suspicion, DOT, or NDOT)	Non-Negative Test Review
Rapid Addition of Sites	Turnkey Training Solutions	Chain of Custody Verification

Simplified Billing	Random Testing	
	Quality Assurance Programs and Reporting	
	Online Record Storage	

**24.6**  
Missed Work Days  
Per Year\*

Employees with substance use disorders miss nearly double the amount of days than their average counterparts. Most of these extra days are associated with injury and illness.

## Additional Medcor Service Benefits

### Online Program Management

Medcor's web-based system allows you to manage all aspects of your screening program online. Data feeds from laboratories upload automatically so information stays current. Users can authorize tests at their convenience. Searching for results is easy—the system can be set to send email notifications when results are updated. You can view data and reports online, including images of the actual chain-of-custody form. Reports can also be downloaded.

### Physical Exam Scheduling

When an employee needs a pre-placement or post-offer physical, Medcor helps manage the appointment. Medcor can locate a clinic for the individual, schedule the physical, and even reschedule when needed. After the physical is complete, Medcor then follows up and the record of the physical is stored in our web-based system. This service takes the hassle out of managing physical appointments and following up.

### Integration

Our drug and alcohol testing programs integrate with Medcor's other workplace health and safety services to offer employers a comprehensive advantage in preventing unnecessary claims and reducing costs.

Ready for the next step toward a safer  
and more productive workforce?
